PROFESSIONAL SUMMARY

Aspiring Software Engineer (B.Tech CSE - AI & ML, graduating 2027) experienced in building and deploying full-stack (MERN) and AI-powered applications, including an LLM-based secure code review platform. Actively strengthening Data Structures & Algorithms and problem-solving skills through consistent LeetCode and competitive programming practice. Comfortable with Object-Oriented Programming and Database Management Systems from academic coursework and project work. Focused on writing secure, efficient, production-ready code.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript (ES6+), C, SQL.
- **Frontend:** React.js, HTML5, CSS3, Responsive Design
- **Backend:** Node.js, Express.js, FastAPI, REST APIs, JWT Authentication
- **Databases:** MongoDB, MySQL, Firebase
- **CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Schema Design, Operating Systems.
- **AI/ML:** LLMs, RAG, Prompt Engineering, OpenCV, Scikit-Learn, NumPy, Pandas, TensorFlow (basics)
- **Tools:** Git, GitHub, Postman, Docker (basics), VS Code, n8n, Azure Databricks.

EXPERIENCE

Full Stack Developer Intern

Feb 2026 – Apr 2026

Infosys Springboard | Virtual Internship

- Developed responsive frontend modules using React.js and secure backend REST APIs using Node.js and Express.js integrated with MongoDB, improving application load efficiency.
- Collaborated in an Agile environment using Git/GitHub for version control, debugging, testing, and application optimization.

AI Summer Intern

Jun 2026 – Jul 2026

Cognizant – On site

- Built enterprise AI application workflows involving prompt engineering and API integration to streamline internal data processes.
- Applied core software engineering principles to develop, test, and debug AI-driven solutions in a collaborative team environment.

PROJECTS

AI Secure Code Review Assistant — [Github](#)

Python, FastAPI, Groq LLM, RAG, Streamlit

- Built an AI-powered secure code review platform that achieves 100% masking of API keys, credentials, tokens, SSH keys, and PII via regex-based pattern matching before data reaches the LLM.
- Designed a Retrieval-Augmented Generation (RAG) pipeline to enforce organization-specific coding standards, generating secure refactoring suggestions while preserving code confidentiality.

Leave Management System — [Live Demo](#)

Node.js, Express.js, Mongo DB, React

- Designed a normalized MongoDB schema and scalable REST APIs for leave requests, approvals, and automated email notifications across dedicated HR and Employee portals.
- Implemented JWT authentication with role-based authorization to secure access control across user profiles.

Franchise Bridge — [Live Demo](#)

MERN Stack

- Built a full MERN platform connecting businesses with franchise partners, featuring responsive React interfaces and backend APIs for authentication, business listings, and optimized search.
- Modeled scalable MongoDB schemas designed to support search and listing features under high simulated concurrent usage loads.

EDUCATION

SRKR Engineering College

2023 – 2027 (Expected)

B.Tech in Computer Science Engineering (AI & ML) | CGPA: 8.9/10

ACHIEVEMENTS & CERTIFICATIONS

- Second Prize Winner – Vedic Vision Hackathon (2025)
- Executive Body Member, SRKR Coding Club | Student Mentor for junior programming fundamentals
- Google GenAI Virtual Internship | Python Full Stack Development (EduSkills) | Android Development Internship (EduSkills) | Introduction to IoT (NPTEL)
